Sonic and sega all stars racing app

Sonic & SEGA All-Stars Racing was not created with educational intent and we do not recommend it for learning. If Sonic is the fastest thing in the world, why does he need a car? If you've been jonesing for a new racing game you can carry in your pocket, consider Sonic & All-Stars Racing Transformed, which is now free on the App Store as well as Google Play. See, Android users? They haven't forgotten you. I told you the day was coming, and he did. I have to go fast! The game was previously available for \$4.99, so if you bought it for sticker price, that's too bad for you. In fact, it's cool - Sega has given players who took part in the original launch a VIP Pass (worth \$4.99) that will unlock four playable characters, including Sonic. So it's like you're really investing in your game future. On April 29, Metal Sonic and Wreck-It Ralph will be added to the game as playable pilots. If you were looking for a reason to pull the trigger, there's no better time to take the app than now, since it's, well, free. If you need driving music, could I suggest I'm Your Torpedo or MU-IC? Developer Website App Support Privacy Policy I don't want to criticize the iOS version of Allstars Racing too much, but when you think about it, the game becomes a nuisance half the time. I don't want to criticize the iOS version of Allstars Racing too much, but when you think about it, the game gets a nuisance half the time. Glitches are hard to avoid when playing causing strange issues that annoy. The character range is too short. Why couldn't they add other characters like Ulala or even Amy Rose? The controls are not bad, but the brake button is frustrating. The articles are not very varied. The tracks are brilliant and are unique and fun. Overall, it's a generally good port, not quite worthy of spending your money on, but since it's free for a limited time, you might want to check it out. Expand Expand Expand
